

Pig-E-Gel

HYDRATING NUTRIENTS FOR PIGLETS AND SOWS IN FARROWING

www.asp-inc.com

Specification Sheet

INDICATIONS

Pig-E-Gel dry powdered stabilizer mixes with farm water and gels quickly to provide an Ideal Solution of Hydrating Nutrition while aiding the delivery of oral treatments including medications, live vaccines, and probiotics for piglets and sows in farrowing.

ADVANTAGES

- Simply add water... Cool water gelling formula mixes easily on the farm to hydrate piglets or sows that are off-feed during illness or stress
- Stabilizing antioxidants, pH buffers and vital electrolytes preserve your added live vaccines and probiotics for prolonged effectiveness in chlorinated water
- Mixed gel forms an excellent edible carrier for other oral treatments for piglets and sows refusing feed
- Soft gel prepared with water is easy to consume and digest
- Energetic carbohydrates promote water uptake by intestinal cells
- No preservatives or refrigeration required

INGREDIENTS

Calcium Sulfate, Water Stabilizers, Grain Products, Sodium Phosphate, Potassium Phosphate, Salt, Potassium Chloride, Sodium Bicarbonate, Artificial Flavoring and Artificial Coloring.

CAUTIONS

Keep out of reach of children.
Not for human consumption.

PACKAGING

2 x 19lb. (8.62kg)
bags per case

DIRECTIONS FOR USE

In a clean open top container, thoroughly mix 20 fl. oz (4 scoops) of Pig-E-Gel powder with each gallon of cool clean water (500 grams with 3.8 liters) to create a strong gelling solution. Stir for 1 minute to make a uniform solution that becomes firm for scooping within 10 minutes.

To supplement baby pigs in farrowing:
Prepare enough mixed Pig-E-Gel for pigs to fully consume, placing gel on comfort pads or feeding surfaces using these guidelines:

Age	Volume to scoop
Week 1	1 ounce (30 cc) per pig
Week 2	2 ounces (60 cc) per pig
Week 3	3 ounces (90 cc) per pig
Sows	8 ounces (236 cc) per feeding

Each 19 lb (8.62 kg) bag of Pig-E-Gel powder will make approximately 17 gallons (64 liters) of finished gel for feeding.

Optional addition of other active additives:
To deliver oral vaccines, probiotics or other feed additives in Pig-E-Gel, dissolve the desired doses of the additive in the water portion before mixing with Pig-E-Gel to achieve uniform and rapid supplementation.

This product does not contain restricted animal material.
