CHICK GEL GREEN

HYDRATING ENERGY AND VITAMIN SUPPLEMENT FOR DAY-OLD POULTRY

Animal Science Products Incorporated

www.asp-inc.com

INDICATIONS

Hydrating energy and vitamin supplement for day-old poultry

ADVANTAGES

- Cool-water gelling formula mixes easily to supplement chicks during transport or stress
- Provides hydration for transport
- Gives hatched poultry immediate energy and rich vitamin supplementation
- Soft gel is easy to consume and digest
- Engineered to deliver active health care substances such as nutrients and live biologicals
- Jump-starts body metabolism and clears incubation waste for a quick start
- No preservatives or refrigeration required

INGREDIENTS

Pregelatinised Starch, Algae Extract, Calcium Sulfate, Disodium Phosphate, Citric Acid, Monopotassium Phosphate, Potassium Chloride, Sodium Bicarbonate, Niacin Supplement, Vitamin E Supplement, Vitamin A Supplement, Ascorbic Acid, D-Calcium Pantothenate, Sodium Chloride, Vitamin D3 Supplement, Biotin Supplement, Riboflavin, Menadione Sodium Bisulfite Complex, Magnesium Sulfate, Pyridoxine Hydrochloride, Thiamine Hydrochloride, Folic Acid, Vitamin B12 Supplement, and Artificial Coloring.

CAUTIONS

Keep out of reach of children
Not for human consumption

PACKAGING

1.5 kg Bags or
12 kg (8 x 1.5 kg) Bags

DIRECTIONS FOR USE

MIX RATE
In a clean homogenizer or liquid blender, thoroughly homogenize each 1.5 kg bag of AviStart powder into 15 liters of cool clean water for 1 minute to create a gelling solution. Pour the liquid into a separate container for the gel to stand for 10 minutes. When the gel is firm, scoop into chick transport boxes or desired feeders. Scan the QR code to see further mixing details.

MIXING INSTRUCTIONS
For uniform and rapid supplementation of optional probiotics or other feed additives, thoroughly mix the gel until fully dissolved before adding any nutritional components.

To supplement day-old birds in hatcheries:
In the hatchery prior to transport, scoop the prepared gel into transport boxes. Approximately 100ml is recommended for 100 birds. The 1.5 kg container of AviStart will make approximately 15 liters of finished gel, sufficient for 15,000 day-old chicks or poults.

To supplement birds after placement:
Scooped gel may be placed on brooder paper or on top of feed in pans at a recommended feeding rate of 100ml for 100 birds. Each 1.5 kg container is sufficient for 15,000 placed birds.

STORAGE

Store in cool dry place
